

Energy Efficiency Forum

Invitation to the [Energy Efficiency Forum](#) for Cape Town's Commercial Sector on 16 March 2016.

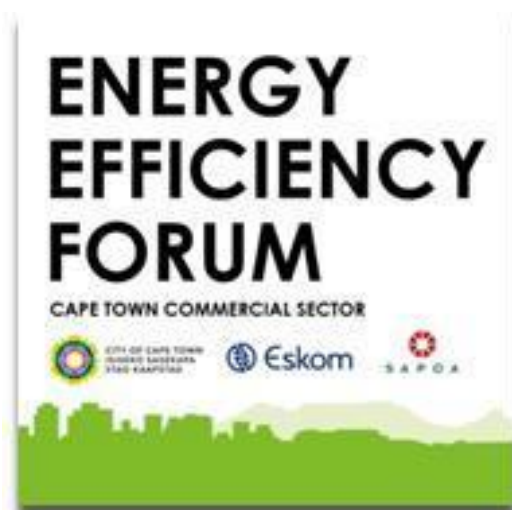

The main focus is on safe and legal solar photovoltaic (PV) systems, and lessons learned from those who've installed them.

The City of Cape Town will launch guidelines, including what to look for in a PV service provider.

A panel will share advice and lessons for those who want to 'go solar'. SANEDI will present the new national standard for Energy Performance Certificates, and reporting energy performance of commercial buildings will be discussed.

Updates will be given by City of Cape Town, Eskom, Western Cape Province, SAPVIA and GreenCape. Attendance is free.

Visit www.capetown.gov.za/EnergyEfficiencyForum, RSVP to eeforum@capetown.gov.za.
