Enabling additional capacity into the Grid

Non-Eskom generation purchases

- Transmission network
- Distribution network.

Purchase pricing options

- Year-ahead time-of-use static adjusted annually by the average Eskom price increase
- Dynamic day-ahead per hour reflecting marginal costs of generation per hour.
- Choice of price option locked-in on 1 April for 12 months.

Terms

- 3-year contract
- With / Without a base-line
- With or shortly anticipating license / registration to generate.
- Traders with mandate from generation owners
- Maximum purchase contract value with a minimum 3-month review period.

Year-ahead **Static** time-of-use (ToU) pricing

1 April 2023 to 31 March 2024

Commercial energy rate (R/MWh), excluding VAT		
	High-demand season	Low-demand season
Peak	3 638.90	1 510.14
Standard	909.73	849.08
Off-peak	606.48	606.48

- Based on the NERSA approved cost recovery for Eskom generation.
- Recovers the average cost of generation

- High-demand: June to August
- Low-demand: Rest of year
- Contractual year is April to March
- ToU periods subject to Eskom Board decision at start of the year.

Illustrative ToU periods

Proposed TOU hours		0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23

Day-ahead **Dynamic** hourly pricing

EDEM determined levels

- Eskom dynamic energy markets (EDEM) is a day-ahead internal Eskom market.
- Prices calculated 14h00 the day before.

Dynamic purchase rate R/MWh

- Based on the marginal cost of generation in each hour.
- Subject to market price cap.

Information and requirements highlights

1. Primary Generator site details including:

- If existing, new, Eskom or municipal point.
- Grid connection voltage and nearest sub-station.
- Gross generating capacity of facility (MW)
- Net capacity of facility (MW)
- Generating technology specifying type of fuel, maximum export capacity (MW) and if there any offset for own generation?

Application

1. Grid code compliance
2. EIA approvals, and/or NERSA approval
3. Electricity generation license or certificate of registration
4. Certificate confirming compliance with conditions precedent.
5. Section 34 DMRE IPP PPA Facility to provide legal opinion on requisite capacity and authority to sell.

Conditions precedent

1. Synchronized, connected and/or commissioned Facilities
2. Procure the issue of the Notice of Commencement of each Facility.
3. Metering enabled for commercial sell of energy
4. Remote meter interrogation and data retrieval by Buyer with physical sealed inspection.

Commercial readiness

1. Signed PPA
2. Daily day-ahead hourly generation forecasts by 09h00.
3. Seller operational and emergency contact personnel.

Commercial operation

All new vendor registration requests must be sent to: vendormdm@eskom.co.za

1. **Proof of award of contract (DET Acceptance letter / Power Purchase Agreement).**
2. Current Central Supplier Database (CSD) report / CSD Number .
3. Original or certified copy of a valid BBBEE certificate / Sworn Affidavit for EME's and 100% Black Owned QSE's
4. **Company Share Certificate where applicable / Association Agreement / Partnership Agreement / Trust Deed**
5. **Letter of Good standing / COIDA**
6. Proof of Professional Registration
7. SHE and Quality reports that were done during evaluation if applicable
8. Tendering letter – Application form
9. Declaration of Interest report
10. Shared certificate for 51 – 99 % black owned applicable private companies (Pty) only not CC's
11. If a company is owned by a person living with disability - a medical certificate confirming permanent disability.
